

PSYCHO FOR PSYCHOPY!

An Introduction to Creating Experiments in PsychoPy

University of
Zurich ^{UZH}

English Department

INSTRUCTOR

Mason A. Wirtz
University of Salzburg

DATE

Friday
25th NOVEMBER 2022

TIME

Fri 09:00–12:00

PLACE

University of Zurich
Room KOL-G-212
Max. capacity 15 persons

COURSE DESCRIPTION

In this workshop, we explore the basics of PsychoPy, an open-source interactive experiment building environment that allows you to customize and run a wide range of experiments in the behavioral sciences. This brief workshop is aimed at PhD and MA students who plan to run, e.g., psycholinguistic or cognitive experiments. To ensure we all gain hands-on experience, we will develop two of our own experiments, one with a psycholinguistic and one with a sociolinguistic focus. No prior programming experience is required.

We will cover the following topics:

- ◆ Basics of PsychoPy and how to use it
- ◆ Builder interface of PsychoPy
- ◆ (Randomized) Block designs
- ◆ Adding (trial-by-trial) feedback

LANGUAGE

English (and/or German)
